Description

Qadvanced Automated Honeycomb shades are elegant, energy-efficient and available in a wide range of colors.

Our honeycomb shades know how to make an impression — in the right way. Available in more than 80 designer fabrics and style options, you can find the right look for any space, and our sleek, sophisticated designs ensure wires and battery wands always stay tucked out of view.

Our shades are spring-counterbalanced, meaning they're nearly silent and two to three times as efficient as other systems. Our honeycomb shades can reduce overall energy costs, too, by keeping rooms cool in summer and warm in winter.

QMotion honeycomb shades can be operated by remote control, smart phone or tablet or with our patented manual override feature.

- * Dual operation for manual and remote control
- * Color coordinated head and bottom rails
- * Uses standard D cell Batteries
- * Headrail faceplate removes for battery access
- * Battery life expectancy up to 3 years
- * Easy battery replacement
